IMG jaws

Years of experience have enabled Indeco to meet the specific demands of the market by designing and developing - with all our usual excellence in terms of innovation, quality and reliability - this line of equipment for a wide range of sectors, from demolition to forestry jobs. The five different models of Indeco IMG jaws run on the same hydraulic system, an upgrade compared with the previous IDG system, combined with the 360° rotation mechanism found on all of Indeco's other rotating products. Its innovative design features, specifically created to handle each product variant, and its use of special HARDOX® wearresistant steels, have helped to combine some key features such as outstanding robustness and light weight, as well as above-average payload and gripping force. Its exceptional maneuverability, its mounting bracket compatible with other Indeco products, the efficiency of its hydraulic system which ensures maximum precision in handling and is cheap to run are just some of the extra qualities that make Indeco IMG jaws such safe and reliable partners. Having such a wide range of models, in each of the five product variants, means there is always a perfect combination for your carrier, no matter what size it is.

Characteristics of Indeco's Multi Grabs

The full 360° hydraulic rotation **1** ensures better grip in all working conditions.

The high-pressure hydraulic cylinder **2** improves gripping and demolition force.

The hydraulic system is equipped with protective casing **3** for the cylinder and internal linkages.

The synchronised jaws [4] enable smooth movements and handling of thin materials.

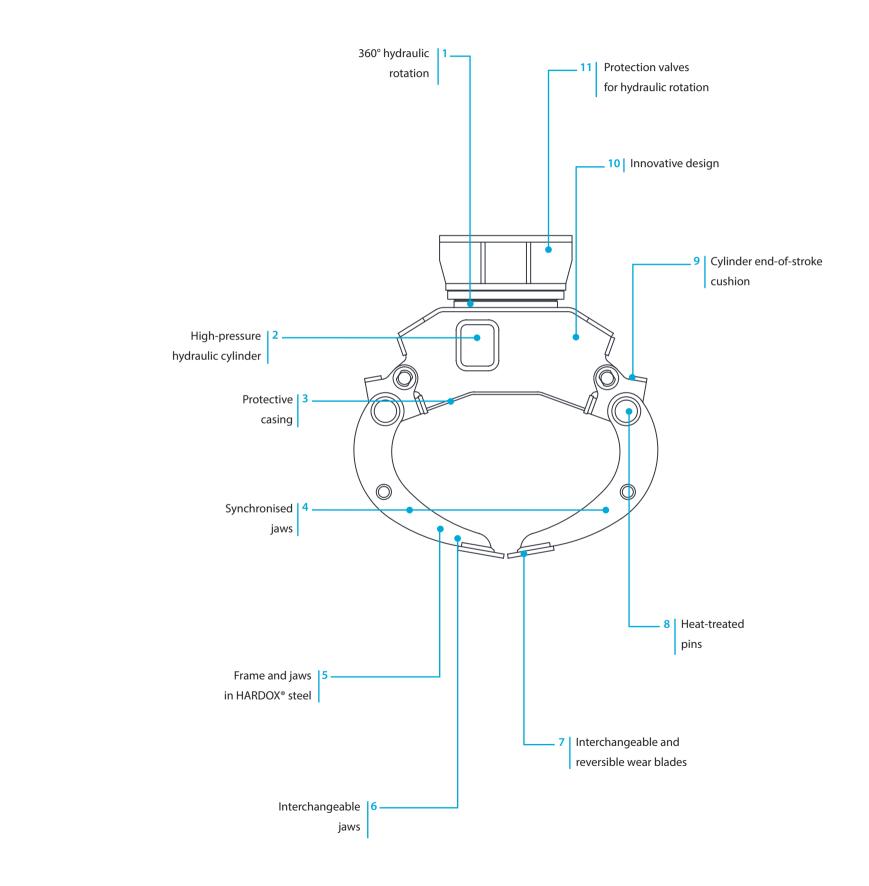

The frame and jaws **5** are made of HARDOX[®] wear-resistant steel.

The interchangeable jaws **6** are available in 5 different versions depending on the material to be handled and the specific use required.

The wear blades [7] are interchangeable and reversible, and you can mount teeth for better efficiency and reduction of maintenance costs.

The pins **8** are heat-treated to improve strength. The cylinder is equipped with an end-of-stroke cushion **9**. The innovative design **10** provides better grip, easier handling, and an above-average load volume. The hydraulic rotation mechanism is equipped with

protection valves 11.

IMG S - Sorting Jaws

Indeco IMG S sorting jaws are the ideal tools for sorting waste materials from demolition work; for clearing stony ground and for dredging rivers and seas.

IMG D - Demolition Sorting Jaws

Indeco IMG D demolition sorting jaws are ideal for light demolition jobs such as demolishing wood and brick

structures and can also be used to select and handle waste materials. Their unique structure, outstanding

maneuverability, power and high payload are ideal for

recycling and recovery.

| Sorting Jaws | IMG 300 S | IMG 400 S | IMG 600 S | IMG 1200 S |

IMG H - 3+2 Material Handling Jaws

Designed to facilitate handling of large objects such as scrap metal, vehicles and other demolition scrap, IMG H jaws provide a safe, powerful grip thanks to their strong interlocking teeth and hydraulic rotation system.

| Material Handling Jaws 3+2 | IMG 300 H | IMG 400 H | IMG 600 H | IMG 1200 H |
|------------------------------|-----------|-----------|-----------|------------|
| Attachment operating weight* | 710 lbs | 950 lbs | 1450 lbs | 2850 lbs |
| Maximum opening | 36 in | 40 in | 50 in | 60 in |
| Depth | 22 in | 24 in | 26 in | 34 in |

| Material Handling Jaws 3+2 | IMG 1700 H | IMG 2300 H | IMG 2800 H | |
|------------------------------|------------|------------|------------|--|
| Attachment operating weight* | 4000 lbs | 5400 lbs | 6600 lbs | |
| Maximum opening | 70 in | 70 in | 80 in | |

Accessories

1 Indeconnect system

New remote monitoring system, based on the principles of the Internet of Things, to prevent equipment obsolescence and keep high performance. The **'Indeconnect'** system consists of a **device** equipped with 4G technology for a wireless connection to the network, to be mounted on the equipment, and a cloud-based **web platform** you can access from mobile devices (with an app) or from PC, that lets you view the data transmitted in real time by each installed device: working hours, working position in space, hydraulic oil temperature, ambient temperature, GPS position, and more.

Through Indeconnect you can:

- Monitor productivity, making sure each Indeco tool is working as intended
- Check operations, verifying in real time the various internal and external parameters of the equipment to make sure that it is used in optimal conditions and correctly
- **Increase security**, by remotely checking the position of the equipment through GPS
- **Plan maintenance**, monitoring the health of each Indeco tool in real time, also through the automatic alert and messaging system that lets you order spare parts and reduce machine downtime to a minimum
- **Optimise rental**, by supervising and monitoring the management of rented equipment.

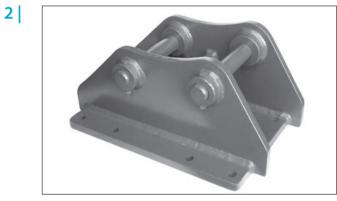

2 Mounting brackets

Each mounting bracket model can be used with all Indeco products in the same class.

3 Connecting hoses

We recommend using original Indeco high- and lowpressure hoses to connect various tools to the hydraulic system on the carrier.

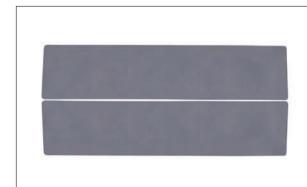

3

5

4 | Wear blades

Interchangeable and reversible wear blades for greater efficiency and lower maintenance costs; teeth can be mounted.

5 Quick change teeth - IMG

Teeth with quick-change inserts are available upon request. Easy to replace during maintenance, they are ideal for use in quarries, where the equipment is subject to consistently high levels of wear and tear.
